HEPATITIS C UPDATE

2021

FRIDAY, APRIL 16, 2021 // 8:00 AM - 4:30 PM
HYBRID VIRTUAL CLASSROOM

TARGET AUDIENCE

Advanced Practice Nurses, Nurses, Physicians, Physician Assistants, and other Healthcare Professionals in primary care, urgent care, and inpatient settings.

DESCRIPTION

Hepatitis C virus (HCV) is the most common blood-borne illness in the United States and is the leading cause of liver failure, liver cancer, and liver transplantation. Approximately half of persons with HCV have never been tested and do not know they are infected. The Hepatitis C Update 2021 aims to educate and train healthcare providers in the best practices for screening, diagnosing, management, and treatment to work towards eliminating viral hepatitis C in our communities. We will explore the nuances of providing care to this population through an intersectional lens.

PROGRAM FORMAT

Join us live from 8:00am - 12:00pm for live webinar sessions. Then, view the remaining sessions at your own pace. At the end of the conference, fill out an evaluation and print your own certificate. You will have access to all lecture videos for 6 months.
